

FLEXIBLE NOSEPHARINGOSCOPE with cable - 12.000 pixel - 3.8X300 mm

Code: 71604
Category: Nosepharingoscopes - Germany
Unit of sale: 1 pc.
Minimum order: 1

Description: FLEXIBLE NOSEPHARYNGOSCOPE with cable

The high precision multi-lens optics creates an optimal image.
The thin insertion tubes are exceptionally maneuverable and have a special wide angle lens whereby a precise tip control and a remarkable depth of focus are reached.
Exacting workmanship and high quality materials create absolutely homogeneous illumination.
The handpiece is ergonomically formed and the insertion tube is especially comfortable for the patient.
This naso-pharyngoscope, with its proven design, is guaranteed to bring years of trouble-free service.

- wide angle, multi-lens objectives for excellent image quality
- excellent ergonomics allows one hand operation
- suitable for mechanical cleaning and disinfection

Made in Germany.

Supplied in lightweight aluminium rigid case with fibre optic cable, leakage tester and user manual (GB, IT).

Technical Specifications:

- Resolution: 12,000 pixels
- Working Ø: 3.8 mm
- Length of tip deflection: 20 mm
- Direction of view: 0°
- Weight: 260 g
- Working length: 300 mm
- Total length: 535 mm
- Tip deflection: up 140°, down 140°
- Depth of focus: 6-1,000 mm
- Field of view: 70°
